**BID SPECIFICATIONS FOR
DURABLE RETRO-REFLECTIVE PREFORMED PAVEMENT MARKING MATERIALS**

General Information

These specifications are for durable Retro-Reflective preformed pavement marking materials.

All of the preformed markings shall be capable of being adhered to asphalt, concrete or Portland cement by a pre-coated pressure sensitive adhesive. A primer may be used to precondition the pavement surface for some of the material. The bidder shall have available on request all equipment necessary to install materials (**there will be no costs associated with this equipment use, and will not be added as part of any unit costs in this bid**) and supply all recommendations for application that will assure the materials shall be suitable for use for one (1) year after date of receipt.

Bidders shall be pre-qualified by the Mobile County Traffic Department through the successful testing and/or use of the specified material for a period of at least one (1) year. Exception may be taken by non pre-qualified bidders, **providing with the bid**, evidence of the successful application of at least 5,000 square feet of material for at least three (3) months within the State of Alabama. All bidders shall show, **in writing and submitted with bid**, that their materials have been tested and approved for use on roadways in Alabama by the Alabama Department of Transportation.

Should material failure occur, as in bead retention, surface adhesion, discoloration, etc., when applied in accordance with manufacturer's instructions, the vendor shall replace all such materials in addition to reimbursing Mobile County for all costs involved in removing and re-installation of the defective material.

Materials provided under this bid shall meet or exceed current applicable ITE and FHWA standards as they relate to reflective pavement marking products as well as current ALDOT specifications. In the event of conflict between these specifications and those named above the requirement of these specifications shall prevail.

Materials purchased under this contract shall not be reversible.

Specifications for durable, retro-reflective, preformed pavement markings with improved retro-reflectivity retention:

I. Materials – General

The preformed markings shall consist of white or yellow tapes/films with pigments selected to conform to standard highway colors. These films shall be manufactured free of lead or other heavy metal compounds.

Preformed words and symbols shall conform to the applicable shapes and sizes as outlined in the current “Manual on Uniform Traffic Control Devices for Streets and Highways”.

The preformed markings shall be capable of being adhered to asphalt cement concrete or Portland cement concrete by a pre-coated pressure sensitive adhesive. A surface preparation adhesive may be used to precondition the pavement surface. The preformed markings shall conform to pavement contours by the action of traffic. The pavement marking shall be capable of application on new, dense and open-graded asphalt concrete wearing courses during the paving operation in accordance with the manufacturer’s instructions. After application, the markings shall be immediately ready for traffic. The bidder, shall identify proper surface preparation adhesives (where necessary) to be applied at the time of application, all equipment necessary for proper application, and recommendations for application that will assure effective product performance.

The preformed markings shall be suitable for use for one year after the date of receipt when stored in accordance with the manufacturer’s recommendations.

II. Classification

The markings shall be highly durable retro-reflective, pliant polymer materials designed for longitudinal and word/symbol markings subjected to high traffic volumes and severe wear conditions such as shear action from crossover or encroachment on typical longitudinal configurations such as edge and lane lines.

III. Warranty

The manufacturer shall warrant that pavement marking material sold for this application in the United States and Canada will remain effective for its intended use under normal traffic conditions and meet the minimum retained coefficient of retro-reflection value of 100 millicandelas per foot squared per foot-candle (measured at 1.05° observation and 88.7° entrance angles) subject to the following provision:

Application*	Warranty
Longitudinal Markings	6 years
Words and Symbols	2 years

If the markings are applied in accordance with all the manufacturer’s application recommendation and fail during the warranty period to retain the minimum reflectance values, fail to adhere to the roadway, or fail due to complete wear-through during the warranty period shown above (from the date of installation), the manufacturer’s sole responsibility and purchaser’s and user’s exclusive remedy shall be:

The manufacturer will provide the replacement materials to restore the marking to its original effectiveness.
