

REQUEST FOR COUNTY INSTALLED DRIVEWAY

Mobile County Forces shall install, for land owners, **ONE (The First)** driveway access for new single family homes. This service will be provided on Mobile County maintained Right-of-Way only, and only one time per legal lot. Proof of ownership and building permit or power service will be required with the submission of this request. The County will not install driveways where curb cuts are required.

Persons requesting a driveway installation shall mark the desired location with two wooden stakes placed approximately 24' apart for evaluation. A representative of Mobile County Public Works will evaluate the site and determine the feasibility of the location and proper size pipe for the ditch culvert. Pipe size and length shall be provided to the landowner so they can purchase the pipe required for the driveway installation. Upon receipt of proof of purchase of the pipe, installation shall be scheduled.
