

Electronic Plan submittal requirements for cell tower permits:

Building permits will be required for all new construction as well as antenna modifications/additions

A structural analysis of the tower is required to demonstrate that the existing tower has the capacity to safely support the antenna modifications.

If no electrical or mechanical work is necessary; provide a notarized letter stating that no electrical or mechanical work will be performed

Provide contractor's information and contract cost. Include a copy of an Alabama County business license, and Alabama General Contractor's license if required.

Please complete and upload the following:

- Building Permit Information Sheet
- A full set of construction drawings
- Structural analysis, if adding antenna or modifying existing antenna/tower
- Building code summary (if new)
- New construction: provide engineered site plan, approved by Mobile County Engineering
- Adding or modifying equipment: provide approved engineered site plan, or waiver from Mobile County Engineering.

Mobile County Engineering 251-574-8595

- \$100.00 plan review fee is due upon applying for permit – send check via U.S. Mail or other delivery service, or complete credit card authorization form and submit with plan upload
